ABOUT ME

I am a FullStack Software Engineer with extensive professional experience, including developing projects for large companies. I have built strong skills in multiple programming languages as well as in managing both relational and non-relational databases.

EXPERIENCE

Codika - Software Engineer
06/2023 - Present

- I developed large-scale projects for prominent clients such as Centro Cuesta Nacional, Banco Popular Dominicano, Bondelic, SkyHigh, Metaldom, Analisa, and Seprisa.
- I used technologies like React, NestJS, .NET Core, Angular, and Django to create efficient, scalable, and tailored web solutions.
- I worked as a Fullstack developer, adapting to the needs of each project, which involved focusing on both Frontend and Backend as required.

Kalifika - Software Engineer
11/2023 - Present

- I developed the BackOffice for a credit bureau serving major Dominican banks, using Angular for the frontend and Django for the backend.
- I was the main person responsible for Frontend development, so most of my work focused on this area, ensuring an efficient, intuitive user interface aligned with the client's needs.

Tennos Business - Software Engineer
06/2022 - 06/2023

- I worked as a FullStack developer on various projects. I developed and maintained modules for a CRM built with Vue.js on the Frontend and .NET Core on the Backend.
- I implemented external services by integrating RESTful APIs and cloud tools, improving connectivity and process automation within the platforms.

SRC - FullStack Developer
01/2022 - 06/2022

- I developed a BackOffice for a mobile app focused on phone top-ups and lottery ticket purchases.
- I created the APIs required to connect the BackOffice with the mobile application.
