ABOUT ME

I am a FullStack Software Engineer with extensive professional experience, including developing projects for large companies. I have built strong skills in multiple programming languages as well as in managing both relational and non-relational databases.

EXPERIENCE

Edays - Software Engineer

08/2025 - Present

- I am responsible for maintaining, improving, and developing new features across the platform, working with Vue.js on the frontend and .NET on the backend.
- I contribute to solutions related to absence management, time tracking, HR documentation, and system integrations, helping improve scalability, performance, and user experience.

Codika - Software Engineer

06/2023 - 08/2025

- I developed large-scale projects for prominent clients such as Centro Cuesta Nacional, Banco Popular Dominicano, Bondelic, SkyHigh, Metaldom, Analisa, and Seprisa.
- I used technologies like React, NestJS, .NET Core, Angular, and Django to create efficient, scalable, and tailored web solutions.
- I worked as a Fullstack developer, adapting to the needs of each project, which involved focusing on both Frontend and Backend as required.

Tennos Business - Software Engineer

06/2022 - 06/2023

- I worked as a FullStack developer on various projects. I developed and maintained modules for a CRM built with Vue.js on the Frontend and .NET Core on the Backend.
- I implemented external services by integrating RESTful APIs and cloud tools, improving connectivity and process automation within the platforms.

SRC - FullStack Developer

01/2022 - 06/2022

- I developed a BackOffice for a mobile app focused on phone top-ups and lottery ticket purchases.
- I created the APIs required to connect the BackOffice with the mobile application.
